The Canon then goes on to speak of the Salvation Army as fellilling the type of this great renunciation. We must hold up the speciacle of devoted lives to emable the speciacle of devoted lives to shape his people to understand the first elements of the Christian faith." And then the Cance quotes in support of his position from the most noble and colf-devoted authority that has adurned the Victorian age "Genera Gordon in one of his last letters, has to'd ue the same hard truth. Writing from Khartonin, he saye, in his trenchant style:
There is not the least doubt that there is an immanse virgin field for an apostle in these countries among the black tribes. But where will you find an apostle? The valiant scale who have left for India " count not their lives dear," they have gone out to be Hindoos to the Hindoos willing to coffer and if need be die if by any means they can eave some.
